Approximately 9,600 CVS Pharmacy® stores dispense more prescriptions than any other drugstore chain. Through face-to-face counseling, our pharmacists drive medication adherence, close gaps in care, and recommend more cost-effective drug therapies.

Innovative CVS Caremark® plan designs help minimize client costs while improving health outcomes for 75 million plan members. We operate five mail order pharmacies and offer broad capabilities that include formulary management and clinical services.

CVS Specialty™ supports individuals with chronic or genetic diseases who require complex and expensive drug therapies. The nation's largest specialty pharmacy, we operate 24 retail specialty pharmacy stores and 11 specialty mail order pharmacies.

At more than 1,100 MinuteClinic® locations, our nurse practitioners and physician assistants diagnose and treat minor health conditions, perform health screenings, monitor chronic conditions, provide wellness services, and deliver vaccinations.

Our Coram® business is one of the nation’s largest providers of comprehensive infusion services. It cares for 140,000 patients annually through a national network of more than 85 locations as well as the largest home infusion network in the United States.

Omnicare® is a leading provider of pharmacy services to the long-term care market. Acquired in 2015, it enhances our service offerings to address the needs of an aging population across the continuum of senior care.

The Novologix® platform allows us to manage claims for drugs covered under the medical benefit with the same precision we apply to pharmacy benefits. Such drugs are usually administered in a physician’s office, an infusion suite, or a patient’s home.
